International Focus Group for Integration

[Creating Integration Content for A2A and B2B Scenarios Using the Integration Content Advisor \(May 16, 2019\)](#)

SAP Leonardo Demo Series

[End-to-End Implementation with SAP's DATA Science and Machine Learning Platform \(April 16, 2019\)](#)

[Intelligent Automation Process \(May 28, 2019\)](#)

Description

Integration within the Intelligent Enterprise

Integration within the Intelligent Enterprise - Overview (May 16, 2019)

Get insight into how the Intelligent Enterprise is fostered by end-to-end integration and learn about the various integration aspects entailed, including out-of-the-box integration, consistent UX, and integration into the SAP Analytics Cloud solution. [Read more](#)

Design-to-Operate in the Intelligent Enterprise - Overview (May 21, 2019)

With SAP's supply chain solutions, you get the operational visibility and customer intelligence to manage your entire supply chain digitally and execute flawlessly today, while transforming your business for the future. [Read more](#)

SAP S/4HANA

Jumpstart your UX Journey with SAP S/4HANA, SAP Fiori, and SAP CoPilot (May 20, 2019)

This session will provide you with a comprehensive overview of SAP tools and technologies available to transform your User Experience (UX) and deliver new innovations without disruption. Attendees will receive a briefing and roadmap of each topic area, along with additional resources to build an actionable UX strategy for their enterprise. [Read more](#)

SAP C/4HANA

SAP Cloud for Customers: New Support Channels and Real-Time Support (April 25, 2019)

In this webinar you will get an overview of the current support channels, including a review of the existing tools and how to make the most of your built-in support, as well as further information about the new additional channels such as the SAP support launchpad, chat and Schedule an Expert. [Read more](#)

SAP BW/4HANA Series

Speed Up Your Enterprise Data Warehouse Implementation with SAP BW/4HANA Optimized Business Content (April 17, 2019)

In this session, learn the deployment options of standard content in SAP BW/4HANA, discover the application components covered by SAP BW/4HANA content, and understand the key design principles. [Read more](#)

Positioning SAP BW/4HANA and SAP S/4HANA (April 24, 2019)

In this session you'll learn how these two products complement each other to cover the full range of enterprise analytics workflows. The webinar will cover positioning and integration touchpoints, an architecture overview, and provides an answer to the question why SAP S/4HANA still needs a data warehouse. [Read more](#)

SAP BW/4HANA – Planning (April 30, 2019)

In this session, we would like to demonstrate how you can integrate on premise-based planning solutions, built by SAP Business Planning and Consolidation, and SAP Analytics Cloud for planning based solutions. [Read more](#)

SAP BW/4HANA Conversion (May 14, 2019)

Join this session to get an overview about the Road to SAP BW/4HANA, including ways to SAP BW/4HANA, special features of the methods, and experience from customer projects. [Read more](#)

How Big Data and Agile Analytics Affect SAP BW/4HANA Architectures (May 23, 2019)

SAP BW/4HANA means simplification and increased flexibility for well-known EDW (Enterprise Data Warehouse) architectures. Agile processes and principles of data lake architectures like 'load first understand later' find entry to new SAP BW/4HANA implementations and architecture considerations. In this session, we will start the discussion of chances and risks merging big data principles and proceedings with DWH (Data Warehouse) best practices. [Read more](#)

SAP Data Hub and SAP BW/4HANA (May 28, 2019)

Big data scenarios are critical to future data warehouse architectures and require special integration scenarios between the data warehouse and the data lake. This session provides an overview of about the SAP Data Hub and illustrates how SAP BW/4HANA can be used to tightly integrate data and data flows, thus enabling completely new analysis scenarios. [Read more](#)

SAP Data and Database Management

Leveraging HANA Graphical Modeling for Analytic Reports (May 8, 2019)

SAP HANA Calculation View is a powerful option that many SAP customers use to prepare data for various analytic reporting front-ends. In this session we will highlight graphical modeling and Calculation Views in particular from several aspects. Finally, the way forward, how to migrate Calculation Views into the new development environment, will be discussed. [Read more](#)

SAP Customer Center of Expertise

SAP's Built-in Support - A New Customer Experience Bringing Support into the Product (April 16, 2019)

Learn and see how built-in support works as integrated part of SAP applications, how it re-defines customers' support experience, get insight into the technology behind built-in support and find out how your company can benefit from it. [Read more](#)

.....

Incident Solution Matching - Enabled by Artificial Intelligence (April 23, 2019)

In this session learn, what is Artificial Intelligence (AI) driven support and how it does improve SAP product support experience? [Read more](#)

.....

Innovations in Measurement Tools (USMM & License Administration Workbench) (May 7, 2019)

The USMM (measurement program for system measurement) has not been changed in the last 5 years, but in 2018 a completely new USMM was released. This session should give an overview of the changes and new functionalities in this re-designed measurement tool. [Read more](#)

.....

Security, Privacy, and Compliance - Keeping Our Customer's Data Safe with the SAP Trust Center (May 23, 2019)

Gain mastery into the "One Stop" SAP Trust Center for all trust related information. Learn about security, privacy, compliance, and agreement documents for cloud, software, and service offerings from SAP. Obtain the latest information on SAP's approach to hybrid and/or all cloud environment. [Read more](#)

.....

SAP ONE Support Launchpad - What's New: 2018 to Date (May 29, 2019)

Join this session to discover the newest innovative applications and features, such as reports on the quality of your incidents, artificial intelligence, Worklists, Smart Navigation, and may more. See them live and in action - experience how they support you, to best perform your daily support related tasks! [Read more](#)

.....

International Focus Group for Integration

Creating Integration Content for A2A and B2B Scenarios Using the Integration Content Advisor (May 16, 2019)

In this presentation you will see how integration can be much easier and faster with the innovational concepts of the Integration Content Advisor which combines crowd knowledge with machine learning. You will also see the ICA live in a demo as our roadmap. [Read more](#)

SAP Leonardo Demo Series

End-to-End Implementation with SAP's DATA Science and Machine Learning Platform (April 16, 2019)

In this live demo session, we will present a preview of SAP's Data Science and Machine Learning Platform (codename ODIN). We will showcase how to use this new platform to implement a Machine Learning project end-to-end. [Read more](#)

Intelligent Automation Process (May 28, 2019)

This webinar will introduce you to SAP's Intelligent Robotic Process Automation solution, exploring its capabilities, first automation use cases, and the roadmap on how SAP plans to spearhead the intelligent process automation journey. It will cover the solution components and architecture in detail and also address dependencies. [Read more](#)
